CSL

DualCom®
SIGNALLING CHANGES

ACCESS ALL AREAS
WITH DUALCOM
WORLDSIM®

CSL DualCom are pleased to announce the arrival of the WorldSIM®. Exclusive to CSL DualCom and embedded into the DualCom GradeShift® range, the WorldSIM® provides Installers with access to all four UK mobile networks in one single product. The DualCom WorldSIM® is the only closed user group security enabled SIM that has this functionality.

CSL DualCom have made a significant investment to provide Installers with secure fixed links to each of the networks as opposed to relying on IP links which can be unreliable. The WorldSIM® is contained within the Vodafone secure user group and it is also part of the DualCom Gemini Managed Network providing the integrity of signalling Installers have come to expect from market leader, CSL DualCom.

The WorldSIM® is a considerable step forward for secure signalling and provides Installers with near 100% radio coverage in the UK.
